

Java Programming / Programming Questions.

Q1. Prime Number - what prime numbers

Q2. Prime numbers in a given range

Q3. Armstrong's Number

Q4. Fibonacci Series

Q5. Palindrome Number.

Q6. Factorial by using recursion.

Q7. Reverse string by using recursion

Q8. Check string is Palindrome or not without reversing

Q9. Sum of digits present in a string.

Q10. Vowels and consonants (count) present in a given string.

Q11. Balanced String.

Q12. Reversed each word of a given string.

Q13. I/p "Hello world Hi".

O/p. "o11eH d lrow i'iH".

Q13. Anagram Strings

→ Both string should have same length

→ Both string should have same characters

$s_1 = \text{race}$

$s_2 = \text{carre}$

Q14. Arrange given array elements in reverse order without using new array.

Q15. Find minimum value in an array.

Q16. Find second minimum value in an array

Q17. Removing duplicates from an array.

Q18. Linear Search in array.

Q19. Binary Search in array.

Q20. Matrix multiplication

(2-D arrays)

Q21. Pascal's triangle

1					
1	1				
1	2	1			
1	3	3	1		
1	4	6	4	1	

Q22. Sum of diagonal elements in an given 2-D array.

Q23. (strings) consecutive frequency present in a string.
